

Atlantis

Kasbo

Know you hurt
Lost in fear
You'll be fine
Just leave it on me

I will heal your heart
Keep me near
What is yours is mine
Just leave it on me

Like a whole new world
I've been needing you to see
It's an endless time
You'll believe in it when you can see it
With an open mind
Then I hope that you'll be free
In a whole new world

Nothing hurts
When you're there
I'll be close
Just leave it on me

I will guard your heart
Help you see
What is yours is mine
Just leave it on me

Like a whole new world
I've been needing you to see
It's an endless time
You'll believe in it when you can see it
With an open mind
Then I hope that you'll be free
In a whole new world

You will believe me when you see it
You will believe me when you see it
You will believe me when you see it
You will believe me when you see it

You will believe me when you see it
You will believe me when you see it
You will believe me when you see it
You will believe me when you see it
