

## Stay with Me

Kasbo

We scream into the night  
It's hopeless every time  
But don't you know the way you work for me when things are done  
?  
I wanna make it right  
'Cause baby its you and I  
So come and look at me again now tell me we are done 'cause

I got it all  
I got the summer and the winter and the fall  
But when you say I'm complicated all the time  
Don't you see the worried maiden waiting by your side?

Now ooh, stay with me  
Now ooh, stay with me

The weather always change  
The flowers haven't changed  
It's all the spectrum everything I guess I'd rather sing  
I know I make you tired but I love you til' I die  
So come and look at me again now tell me we are done 'cause

I got it all  
I got the summer and the winter and the fall  
But when you say I'm complicated all the time  
Don't you see the worried maiden waiting by your side?

Now ooh, stay with me  
Now ooh, stay with me
