

Talk Slow

Kasbo

Take me down, both feet on the ground
Take me down, it feels better when I'm with you
When I'm with you
Call me out, I'm not making sense
Call me out, I get too intense
I sure do, ooh yeah

Talk slow 'cause my head's on fire
I think I need something to cool me down
Talk slow 'cause my mind is wired
And any minute now, I'm burning out
Hold me steady, steady
Hold me steady, steady
Talk slow 'cause my head's on fire
I think I need something to cool me down

Take me down, both feet on the ground
Touch me where it hurts, I think you're the first that knows ho
w
That knows how
Pull my threads, you can tear 'em up
Meters unend, can you make it stop?
Say you could, ooh

'Cause I don't know what to do
To do

Talk slow 'cause my head's on fire
I think I need something to cool me down
Talk slow 'cause my mind is wired
And any minute now, I'm burning out
Hold me steady, steady (Hold me steady)
Hold me steady, steady (Hold me steady)
Talk slow 'cause my head's on fire
I think I need something to cool me down

I know that you're around me
And I know that it's burning up
