

Almost Back

Kaskade

Well I woke up
Took a breath, let it out, then I got up
Cup of coffee, thinking maybe, could be wrong but
Feeling so much better (better)
Doing alright
I was all in, I was walking in a straight line
Feeling open, finally knowing what it felt like
Really thought I was better (better)

Almost made it three whole days
Without seeing you in every face
Thought I was good again, I was good again

You pull me back to that feeling
Every time that I start thinking
I'm almost back, I'm almost back (back together)
I'm almost back, I'm almost back (back together)
Got this way of showing up and
Breaking me with just one touch when
I'm almost back, I'm almost back (back together)
I'm almost back, I'm almost back (back together)

Back together
Back together

I remember how it ended
We were left with only embers
Kept me hoping for a moment, for a flicker
Thought I'd never get better (better)

Almost made it three whole days
Without seeing you in every face
Thought I was good again, I was good again

You pull me back to that feeling
Every time that I start thinking
I'm almost back, I'm almost back (back together)
I'm almost back, I'm almost back (back together)
Got this way of showing up and
Breaking me with just one touch when
I'm almost back, I'm almost back (back together)
I'm almost back, I'm almost back (back together)

Back together
Back together

Baby, one day I will change
Everything will fall in place
And I'll be good again, I'll be good again
