

# Bright Lights

Kaskade

Disco lights in the sky  
Shining down, open your diamond eyes  
Feel that glow, then you'll know  
That you can come alive (Can come alive)  
Shards of glass miles above  
Rivers forming in the shape of us  
Feel that glow, then you'll know  
That you can come alive (Come alive)

There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over  
There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over

Bright lights take you over  
Bright lights take you over

There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over  
There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over

There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over  
There's a place we can go for a feeling  
Where the bright lights take you over  
Bright lights take you over
