

Come Away

Kaskade

I know you're getting lonely in your own mind
It's about the time you take a joy ride
Let's switch it up, give me the control
Just take my hand and I'll take your soul

You'll never understand it if you don't try
'Cause you're so far away from what you might find
Gave you a taste and the whole world froze
Dreaming of ways I could up your dose

Follow me helplessly, don't be afraid of the fall
I'll be your ecstasy, promise that you'll feel it all

If you want someone to chase
To take you to another space
Baby then just come m-m-m away, come away
Baby then just come m-m-m away, come away

If you want a high to chase
To take you to a sacred place
Baby then just come m-m-m away, come away
Baby then just come m-m-m away, come away

I know you're getting lonely in your own mind
It's about the time you take a joy ride
Let's switch it up, give me the control
Just take my hand and I'll take your soul

You'll never understand it if you don't try
'Cause you're so far away from what you might find
Gave you a taste and the whole world froze
Dreaming of ways I could up your dose

Follow me helplessly, don't be afraid of the fall
I'll be your ecstasy, promise that you'll feel it all

If you want someone to chase
To take you to another space
Baby then just come m-m-m away, come away
Baby then just come m-m-m away, come away

If you want a high to chase
To take you to a sacred place
Baby then just come m-m-m away, come away
Baby then just come m-m-m away, come away
