

New James Dean

Kaskade

Fall back, balancing
Tightrope on a silver string
I'm sweet grenadine
As I fade, fade away (come back)

Fade away (come back)
Fade away (come back)

Come on, take a ride with me
High off emergency
But take everything, everything wrong
And make everything, everything
Color up the sky with me
Something that you'd never see
You make everything, everything right
You make everything, everything

Fade away (come back)
Fade away (come back)

Bright lights circling
One way on a laser beam
Live fast on the new James Dean
As I fade, fade away (come back)

Fade away (come back)
Fade away

Come on, take a ride with me
High off emergency
But take everything, everything wrong
And make everything, everything
Color up the sky with me
Something that you'd never see
You make everything, everything right
You make everything, everything

Come back
Come back

Fade away (come back)
Fade away
