Solid Ground

Kaskade

We stand and watch
The world go up in flames
We fight for love
Until we die in vain

When the sky is getting dark
And we're broken in our hearts
When we build our own demise
From the ashes we will rise

When the world, world
World is falling down
Will you be, be
Be my solid ground

When the world, world
World is falling down
Will you be, be, be
Be my solid ground

Be my solid ground

We look off the edge
'Till the waves come crashing in
And we say our goodbyes
To the tides that might have been

When the sky is getting dark
And we're broken in our hearts
When we build our own demise
From the ashes we will rise

When the world, world
World is falling down
Will you be, be
Be my solid ground

When the world, world
World is falling down
Will you be, be, be
Be my solid ground

When the world, world
World is falling down
Will you be, be, be
Be my solid ground
