

# Heart

Kassidy

Eyes could open  
Gazing on the day  
Do it breathe on it, do it choke on it

Time does guide us  
Darker than today  
And it reflects on you as it reflects on me

Ways are changing  
What if we were too  
I should have listened to your heart  
listened to your heart  
listened to your heart  
I should have listened to my heart  
listened to my heart  
listened to my heart

If we shone over  
Would you light the day  
Would you colour it, would you colour it

I would travel  
See the other way  
Would I move on it or move away

Ways are changing  
What if we were too  
I should have listened to your heart  
listened to your heart  
listened to your heart  
I should have listened to my heart  
listened to my heart  
listened to my heart

And if we could last to be the best  
you know someone would come to take it away  
And if we could last to be the best  
you know someone would come to take it away

I should have listened to your heart  
listened to your heart  
listened to your heart  
I should have listened to my heart  
listened to my heart  
listened to my heart

And if we could last to be the best  
you know someone would come to take it away
