

Panic Day

Kassidy

People walking by while you're lyin' in the street asking questions,
Get out a my face and just give me some space for just a little while,
People keep on asking what's the matter with him, what's the problem?
Just let us sit and I deal with you next, and I'll deal with you next,
Just let us sit and I deal with you next, and I'll deal with you next.

Another night on the town, goin' round asking questions,
Where is he going? What's he gonna to do next for attention,
Tryin' to find bliss with another deep breath from the cold air,
,
Polluted with words, should be talking to her, just like before?

Sleep breathe for me,

Sleep breathe for me,

Sleep breathe for me,

Sleep breathe for me,

Sleep breathe for me,

Sleep breathe for me.

Another night on the town, goin' round asking questions,
Where is he going what is he gonna do next for attention?
