

Combustion

Kataklysm

The world you once knew and loved
Is gone
Gone
Everything you once believed in
Is fucked
So fucked

Take a step inside
And feel the rapture

Combustion
Of the inner core
Inversion of all beliefs
Distortion of senses
Combustion
Of the inner self
Confusion of the mind
Destruction of senses

Feel me down your spine
And trigger me to implode
Enter the zone
Where everything is lost

Is lost
Lost
Lost
Lost

And down the abyss we fall
Deep down the rabbit hole, we drown
The savior never comes
And down the abyss we fall
Deep down the rabbit hole, we drown
The savior never comes
Never comes

Take a step inside
And feel the rapture

Combustion
Of the inner core
Inversion of all beliefs
Distortion of senses
Combustion
Of the inner self
Confusion of the mind
Destruction of senses

The world you once knew and loved
Is gone
Gone
Everything you once believed in
Is fucked
So fucked

Feel me down your spine

And trigger me to implode
Enter the zone
Where everything is lost
Lost

Cold world descent into the abyss
Everything will fall
And everything will end
You practice what you don't preach
You do the things you swore against
And now the life you had is gone
Forever
Forever
