

# Temporal

Katatonia

Moving splinters through the mind  
Hope smashed to smithereens  
Baby I'm astray within the colours of your night  
Went away to come back again  
Better off

But I feel unwell  
I cower underneath the clouds  
Can't break the spell now  
Have to follow through  
I see you moving without a sound

Take my heart all the way  
I can't wait to lose you  
And seven miles down  
I hit the ground  
Earthbound, temporal, unfound

Gone  
To carnal pastures  
Heart pushed to discharge

And I'm still unwell  
I cower underneath the clouds  
Can't break the spell now  
Have to follow through  
I see you moving without a sound

It's time to feed the vicious circle

Take my heart all the way  
I can't wait to lose you  
And seven miles down  
I hit the ground  
Earthbound, temporal, unfound
