

I'm anxious, you know this  
I'm anxious and erotic, I know  
You're just like cold water on my face  
You're staple, you're solid  
I can never worried about it  
We fight, but don't get stuck in a bad place

You and me, we got that kind of love  
I mean it  
The way you know me like nobody does  
I'm serious, you show me the good parts of myself  
I promise I wouldn't feel this good with no one else

So you always make it better?  
I want this shit forever  
Whenever we're together, I wanna stay there all night  
All I wanna be is with you, I wanna stay here with you  
And I'm not crazy if I say I wanna love you for life  
Love you for

That night on your roof  
We were dancing, no shoes  
I told you my heart's got some damage  
Guess that's when I knew  
You looked at me, said "That's cool"  
Said "Baby, that's nothing I can't handle"

You and me, we got that kind of love  
I mean it  
The way you know me like nobody does  
I'm serious, you show me the good parts of myself  
I promise I wouldn't feel this good with no one else

So you always make it better?  
I want this shit forever  
Whenever we're together, I wanna stay there all night  
All I wanna be is with you, I wanna stay here with you  
And I'm not crazy if I say I wanna love you for life  
Wanna love you for  
Wanna love you for

You and me, we got that kind of love  
I mean it  
The way you know me like nobody does  
I'm serious, you show me the good parts of myself  
I promise I wouldn't feel this good with no one else  
No, I wouldn't feel this good

So you always make it better?  
I want this shit forever  
Whenever we're together, I wanna stay there all night  
All I wanna be is with you, I wanna stay here with you  
And I'm not crazy if I say I wanna love you for life  
So you always make it better?  
I want this shit forever  
Whenever we're together, I wanna stay there all night  
All I wanna be is with you, I wanna stay here with you

And I'm not crazy if I say I wanna love you for life  
Wanna love you for  
Wanna love you for  
Wanna love you for
