

All I Need Is You

Katharine McPhee

If you could choose to go anywhere
Just close your eyes and imagine
The world belongs to just you and I
If I could be there with you

If any road was one we could take
And any place could be us
We make the choice to leave here today and
I could be there with you

If I am where you are nowhere is too far
So take me with you all I need is you

We go and when you come back again
Everything seems like its new again
Waking nights tell me a story
When I was there with you

If I am where you are no where is too far
So take me with you all I need is you

Someday someday I will be there with you

If you could choose to go anywhere
Just close your eyes and imagine
The world belongs to just you and I
If I could be there with you
I could be there with you
I will be there with you
