

I Will Be There With You

Katharine McPhee

If you could choose to go anywhere
Just close your eyes and imagine
The world belongs to just you and I if
I could be there with you

If any road was one we could take
And any place could be ours
We make the choice, we leave here today and
I could be there with you

If I am where you are, nowhere's too far
So take me with you
All I need is you

We go and when we come back again
Everything seems like it's new then
On rainy nights, tell me the story
When I was there with you

If I am where you are, nowhere's too far
So take me with you
All I need is you, yeah

Someday, someday I will be there with you

If you could choose to go anywhere
Just close your eyes and imagine
The world belongs to just you and I if
I could be there with you
I could be there with you
I will be there with you
