

Sustain Pedal

Kathryn Williams

Your breath from a kiss went down my throat
I felt how you breathed into the world
Kiss me if only for one night
It's not a matter of love
Let's just make one night feel right

Shy away again pull your eyes down
Hold your breath and then let it out

Hold the sustain pedal down
Make this note last until it's drowned
Kiss me and put the world to right
Kiss me if only for one night

Shy away again pull your eyes down
Hold your breath then let it out

Hold the sustain pedal down
Make this note
Last until it's drowned
