

Hearts of Fire

Kathy Troccoli

Every day when you open the door
There's a cold world waiting
You decide to give all that you can
But you find you begin to give in
To the desperation
And your heart gets harder again

Any fool will play it cool till
He's frozen to the bone
But remember, there's an ember
Burning in the Father's own

Hearts of fire burn the night away
Hearts of desire for a brighter flame
Stand by the power living in us
He's given us hearts of fire

In the cold of the night
There is somebody watching
And he looks for fire
It could be anyone that you know
In your heart is the light and the sight
Sets another man's heart ablaze
But it won't if you don't let it show

Never give in to the feeling
That the night will swallow you
It will shatter, it will scatter
Before the fire in you

Hearts of fire burn the night away
Hearts of desire for a brighter flame

Stand by the power living in us
He's given us hearts of fire

Hearts of fire burn the night away
Hearts of desire for a brighter flame
Stand by the power living in us
He's given us hearts of fire

Hearts of fire
Hearts of fire
Hearts of fire
Hearts of fire

Hearts of fire burn the night away
Hearts of desire for a brighter flame
Stand by the power living in us
He's given us hearts of fire

Hearts of fire burn the night away
Hearts of desire for a brighter flame
Stand by the power living in us
He's given us hearts of fire

Hearts of fire burn the night away

Hearts of desire for a brighter flame
Stand by the power living in us
He's given us hearts of fire

Hearts of fire burn the night away
(Hearts of fire)
Hearts of desire for a brighter flame
Oh-oh-oh-oh...
He's given us hearts of fire...
