

There's Still Time

Kathy Troccoli

There you go
Keepin' all your secrets guarded
From your soul
You seem so sure everything
Is always in control
Pay your dues
Gamblin' all that you can lose
So you play
Bend the rules
Life's a game that will not matter
So you say

But there's still time
Won't you come with me
And we'll find where the wrong is right
Don't give in
The world's a lying friend
It deceives you
There's still time
Leave it all behind
What's to lose when there's life to find?
See the light
See it burning bright
Let it lead you

Why do you blow your mind
And quench your spirit for a thrill?
Is it true life is hard
And you can't feel it? Is it real?
See yourself wasting time
That's lost forever, spending all
Cry for help, see your chance
Before it leads you to your fall

But there's still time
Won't you come with me
And we'll find where the wrong is right
Don't give in
The world's a lying friend
It deceives you
There's still time
Leave it all behind
What's to lose when there's life to find?
See the light
See it burning bright
Let it lead you

But there's still time
Won't you come with me
And we'll find where the wrong is right
Don't give in
The world's a lying friend
It deceives you
There's still time
Leave it all behind
What's to lose when there's life to find?

See the light
See it burning bright
Let it lead you

There's still time
Won't you come with me
And we'll find where the wrong is right
Don't give in
The world's a lying friend
It deceives you
There's still time
Leave it all behind
What's to lose when there's life to find?
See the light
See it burning bright
Let it lead you, oh...
