

Fireflies

Katie Costello

Didn't think I'd be the last one
Didn't know I'd see the story end
Didn't think the earth was made of paper
But now I'm standing in a mess of shreds

How can I keep on
When everything is so far gone

When there's nothing left to find or figure out
Planets float in space like fireflies in doubt
Now the tides are turning
And I'm the only one at sea

Didn't think the rumors could be something
Didn't know the earth would be scorched to the bone
Didn't think my life was worth living
But now I'm fighting for one last moment to hold

How can I keep on
When everyone is so far gone

When there's nothing left to find or figure out
Planets float in space like fireflies in doubt
When there's nothing left to find or figure out
Planets float in space like fireflies in doubt
Now the tides are turning
And I'm the only one at sea
It's just me
