Shovel

Katie Herzig

Hearts bend 'cause they can't break When they can't take
All that is given to them

Glass eyes on your sad face
It's a sad story somebody's written on you
Love in my heart, right from the start
So please take me with you

Birds sing out the window Sing out the window sing Do you hear those birds sing out the window Sing out the window sing

Take me with your shovel We'll burry all your troubles All your troubles

Oh the light is always on you Always in the light
The light is always on you Always on you
Always in the light
