

# Tiny Alien

Katie Melua

Who are you my tiny alien  
Why do you love to hide  
Who are you my tiny alien  
What can you see inside

I won't make a sound  
I won't shoot you down  
With my science, and reliance on everything I thought I knew

When you're not of this earth  
You won't know what you're worth  
You've just got to take the pressure together  
Or you'll never survive in this world  
Tiny alien

Who are you my tiny alien  
What are you here to do  
Who are you my tiny alien  
How can I talk to you

What's my DNA  
Can you make it change  
So I can gain new insight and take flight  
And never feel any pain

When you're not of this earth  
You won't know what you're worth  
You've just got to take the pressure together  
Or you'll never survive in this world

Just how far can you fall  
When you still feel so small  
Will you love me through the sorrows tomorrows  
Whatever the future will bring  
Tiny alien

Who are you my tiny alien  
We are just skin and bones  
Who are you my tiny alien  
Why are we so alone

When you're not of this earth  
You won't know what you're worth  
You've just got to take the pressure together  
Or you'll never survive in this world

Just how far can you fall  
When you still feel so small  
Will you love me through the sorrows tomorrows  
Whatever the future will bring  
Tiny alien

Who are you my tiny alien  
Who are you my tiny alien  
Who are you my tiny alien  
Who are you my tiny alien
