

Dive Deep

Katy Rose

I'm lonely a little bit lately
I give but you take, I'm finally awake
It can't be, maybe
There's no turning back from something that lasts

Oh you just turn away
Every time I say

I wanna dive deep with you
I wanna cry streams with you
I wanna feel you underneath me
I wanna be the one that's true
I wanna dive deep with you
Then fall asleep next to you
I wanna keep your heartbeat with mine
In time be something new

I wanna dive deep
I wanna dive deep

We could be, we should be
Everything we want, everything they've got
It's something they say
Don't settler for less, you give and you get

But don't stand in the way
Let me hear you say

I wanna dive deep with you
I wanna cry streams with you
I wanna feel you underneath me
I wanna be the one that's true
I wanna dive deep with you
Then fall asleep next to you
I wanna keep your heartbeat with mine
In time be something new

I wanna dive deep
I wanna dive deep

Wanna be blood under your skin
Find your heart and get in
I don't wanna know where you begin
And where it is I end
I wanna see you open wide
Wanna see where you can't hide
One more piece of you
That lives inside of me

I wanna dive deep
I wanna dive deep (with you)
I wanna dive deep (with you)
I wanna dive deep (with you)
(With you)
