

Feel Good

Kaya Stewart

You're hot like mid-July; your hair is rough like mine
So give me a chance; it's just common sense
We've got a lot in common
Living on cloud nine, we're like The King And I
Got no words left to speak; you knock me off of my feet
Cause we've got a lot in common

Cause you make me feel good
And you make me feel fine
You're always on my mind
And that's alright

Strutting down the street; stings like a honeybee
I was never so sure when you talked to her
Cause we've got a lot in common
When it's just you and I, we always have a good time
I don't understand why we are just friends
Cause we've got a lot in common

Cause you make me feel good
And you make me feel fine
You're always on my mind
And that's alright

Cause you make me feel good
And you make me feel fine
You're always on my mind
And that's alright
Cause you make me feel good
And you make me feel fine
You're always on my mind
And that's alright
