

Only You And I Know

Kayak

The motions we make Turning circles Human satellites Still tied
to the world down below

The road that we take May seem endless But we feel inside Love'
s a river and we'll make it flow

Only you and I know Only you and I know How to find our own way
s To that small hiding place Where no one can go

The secret we share Like a treasure Is a different love It's a
feeling we don't want to show

The reason we care You can't measure But it's not enough Seeds
of love need a good ground to grow

Only you and I know Only you and I know That the distance betwe
en us Won't shatter the dream We had long ago

Only you and I know Only you and I know How to find our own way
s To that small hiding place Where no one can go.

Only you and I know Only you and I know
