

Get Away From Yourself

Keane

Nothing lasts forever
Nothings stick together
Talk to anybody that you know
Where does all the love go?
I'm a little tired of taking your side
When my heart tells me not to
Your life lies before you

And you gotta get away, get away from yourself
If you're cold inside
Get away, get away from yourself
If you need some time
To look around, take a look around
Then you might see a friendly face
Get away, get away from yourself

People rush about you
Get on fine without you
Soon you're gonna see that it's not so
Hard to let you go
And you're gonna find a part of your lonely heart
A place to end, a place to start
If you only look around you (Around you, around you)

And you gotta get away, get away from yourself
If you're cold inside
Get away, get away from yourself
If you need some time
To look around, take a look around
Then you might see a friendly face
Get away, get away from yourself

Time will mend your broken wing
Help and comfort you
You can't, you can't win at everything
No one wants you to
Then your life flies before you
Nothing lasts forever, yeah

Don't fall in the fire
Stay by her side
You'll be lost
She's on your mind
Oh, I was done
Some time on your own
And you are all I find

Time will mend your broken wing
