

# Electric Love

Keel

Turn on the voltage  
And feel the power surge  
I get electrified  
When I feel this primal urge

You've got the power  
When you turn on the juice  
My circuitts overload  
When you turn it loose

Pull the lever  
Flick the switch  
Blow my fuse

Your electric love  
Shocks me through the night  
Your electric love  
Keeps me burning bright

Your power source is a deadly force  
It's all that I desire  
I gotta feel the connection  
When you trip my wire

You've got the power  
To break me in two  
I've got the shaft  
And I'm giving it back to you

Pull the lever  
Flick the switch  
Blow my fuse

Your electric love  
Shocks me through the night  
Your electric love  
Keeps me burning bright

Your electric love  
Shocks me all the night  
Your electric love  
Always turns me on  
You turn me on

Your electric love  
Shocks me through the night  
Your electric love  
Keeps me burning bright
