

# Mine

Keenan Te

I know we weren't perfect  
So tell me why I keep holding on  
Two kids just learning  
I guess we got it wrong  
'Cos look at where we are now  
All this time and somehow  
We messed it up

I know that tryna erase the thought of you just doesn't work  
I'm doing everything I can to numb the hurt  
All of our promises just only make it worse  
Cos I know that now, they're only empty words

Maybe one day we'll try to work this out  
I know that you don't even care right now  
In a perfect world  
You'd be by my side  
I hope you know that I  
Will always need you even if you're not mine

Are you with somebody new?  
Holding on to forever  
Doing all things we'd do  
Moving on hurts so much more  
Cos I can see  
I'm nothing but a fading memory

I know that tryna erase the thought of you just doesn't work  
I'm doing everything I can to numb the hurt  
All of our promises they only make it worse  
Cos I know that now they're only empty words

Maybe one day we'll try to work this out  
I know that you don't even care right now  
In a perfect world  
You'd be by my side  
I hope you know that I  
Will always need you even if you're not mine

I tried everything to heal our mistakes  
Hurt myself just to make you stay  
I said sorry when it wasn't my fault  
But you still don't care at all  
Don't you see what you're doing  
I don't know how you feel nothing at all

Maybe one day we'll try to work this out  
I know that you don't even care right now  
In a perfect world  
You'd be by my side  
I hope you know that I  
Will always need you even if you're not mine

Even if you're not mine  
Will always need you even if you're not mine
