

## Better Not

Kehlani

I don't wanna have to make you choose  
I see the way you look at me and I bruise  
Nothing wrong with keeping secrets for each other (No)  
I never keep nothing from you

Was gonna find you, but I didn't know where you was (Ooh, ooh)  
In broad day, posted up outside the bar (Ooh, ooh)  
I almost died the night when I caught you in somebody's Benz (O  
oh, ooh)  
I better not catch you doing that shit again

And you're not wrong, 'cause you're not mine  
I would choose this dance with you in every life  
Though we're just a little more than friends  
I better not catch you doing that shit again

Who am I to try to make you stay? (No)  
You're so damn good at running away  
You throw around these words like "having fun" and "undefined"  
'Cause what we had ain't even got a name

And you're not wrong, 'cause you're not mine  
I would choose this dance with you in every life  
Though we're just a little more than friends  
I better not catch you doing that shit again

I went to find you, but didn't know where you was  
In broad day, posted up outside that bar  
I almost died the night when I caught you in somebody's Benz  
I better not catch you doing that shit again

I better not catch you doing that shit again  
I better not catch you doing that shit again
