

Touch

Kehlani

I feel you in my bones
Your kisses feel like home
With you I never rush
But this ain't no stupid crush

We don't even need to talk about it
More love, less talk, more love
We don't even need to talk about it
I like it when we talk

But I love it when we touch
I love it when we touch
A little bit too much
I love it when we, when we, when we
I love it when we

There's magic in your hands
Oh, you got me in a trance
Your love is like a wind
Dancing across my skin

We don't even need to talk about it
More love, less talk, more love
We don't even need to talk about it
I like it when we talk

But I love it when we touch
I love it when we touch
A little bit too much
I love it when we, when we, when we
I love it when we

We don't even have to say a word
Won't bite, no, I won't hurt
Speak less and you may learn to feel me, yeah
Baby, yeah
I like it when we talk

But I love it when we touch
I love it when we touch
A little bit too much
I love it when we, when we, when we
I love it when we
