

Insomnia

KEiNO

We don't need to sleep
Light is all we need
You can take my breath away

You don't have to fade
We can stay the same
Long as we can stay awake

All the colours in the sky got me hypnotized
And the light in your eyes

In our insomnia
Dreaming of a lost utopia
We could live forever never die
So close to heaven I need you by my side
Our insomnia
Dancing in a light euphoria
We could live forever never die
So close to heaven I need you by my side
In the...

Endless summer night
See the embers fly
Come on set my heart on fire

Stay forever young
In the midnight sun
Come on we could still get higher

All the colours in the sky got me hypnotized
And the light in your eyes

In our insomnia
Dreaming of a lost utopia
We could live forever never die
So close to heaven I need you by my side
Our insomnia
Dancing in a light euphoria
We could live forever never die
So close to heaven I need you by my side
In the...

I can feel the night grow colder
Time is running out
In insomnia
Insomnia

Tell me we could still be stronger
And the night is young
In insomnia
Insomnia

Stay in the midnight sun
Stay in the midnight sun
We'll be forever young
Stay in the midnight sun
We'll be forever young

In our insomnia
