dripping blood as violent rages on, engulfing our soils - death  
is here,  
ringing fatality of civilization - massacre, the murders at ra  
ndom, in  
attempted genocide - thousand years of social paralysis, fatho  
mless irony  
- humankind in conflicting nature, the beauty and the beast -  
death to  
share, bringing fatality to civilization - ideologies and soci  
al systems  
based on human theories - so basicaly we're all into products  
of our  
corrupted brains! - deep in the void of our hollow hearts - is  
there any  
space left for souls to rest? - deep in the void of our wounde  
d minds - is  
there any chance left for souls to live? - "no time to clean y  
our bloody  
hands, the stains are there in your own blood!" - many years w  
e've tried  
to look ahead and find some solutions - but once again they fa  
il  
miserably, yet life is still going on - is there any space lef  
t for souls  
to rest?
