

# Love Language

Keke Palmer

Can you read my mind?  
Kiss me through my eyes  
That's when I come alive  
From my head to my thighs  
Who are you after dark?  
Let's meet the sun when it rises

I want you to learn me  
You better put in that work, gotta earn me  
Show me that you're worthy  
Don't wanna give in too soon, it's too early  
Ah, touch on me like nobody  
I want you on my body  
Before we leave the party

Talk to me in my love language  
Talk to me in my love language  
Ooh, get a piece of me  
Feel the chemistry  
It's the energy  
Talk to me in my love language

You've got what it takes  
To make me switch up my pace  
You know we got fire and desire  
Goin' for days, don't get tired, tired  
Say you ain't fiendin', you a liar, liar  
Took you off the game, made you retire

I want you to learn me  
You better put in that work, gotta earn me  
Show me that you're worthy  
Don't wanna give in too soon, it's too early  
Ah, touch on me like nobody  
I want you on my body  
Before we leave the party

Talk to me in my love language  
Talk to me in my love language  
Ooh, get a piece of me  
Feel the chemistry  
It's the energy  
Talk to me in my love language

Ooh, ooh, ooh, break my rules  
Convince me to move how you move  
Ooh, ooh, ooh, break my rules  
Convince me to move how you move  
Don't wanna be alone when I'm feeling faded, R-rated  
Better take me home 'fore the moment's wasted

I want you to learn me  
You better put in that work, gotta earn me  
Show me that you're worthy  
Don't wanna give in too soon, it's too early  
Ah, touch on me like nobody  
I want you on my body

Before we leave this party

Talk to me in my love language (Ooh, love language, woah)

Talk to me in my love language (I wanna talk to you, baby, can you, tell me,  
can you keep up now?)

Talk to me in my love language (Oh, yeah, yeah)

Talk to me in my love language (I wanna hear you, boy, can you speak my)
