Cradle You

Kele

It starts with me
This song shared in love

I watch you as you stir
Blissfully, you stir

In a paradise dream
You pick up my call

Sensing my lone spark
We sit together
In the dark

So go long
As you fall, fall, fall
From the stars
I'll take the force

As you land into my arms
I'll keep weightless
Suspended in dreams

Let me restore you
Let me cradle you

You hide in my pocket
You hide in my head

You sink into my brain
Not to be noticed

Under your day dream
I spin in new skin

Undo all the harm
I will tend to you
As you grow toward the light

It's time to get up now
It's time to rise
It's time to get up now
It's time to rise
