

Ocean View

Kele

Dark days upon us
The TV's spreading lies
Looks like all we can do to stay alive is stay inside
Look me in the eye
See how far we've come
I'd do it all again
For you my little one

When high-pressure days are all but through
A penthouse with an ocean view
Is all I want, as long as I have you
The waves would drift into our room
Carry us out under the moon
And dolphins would swim up to our feet

You
What would I do without you, my love?
You, my love

And to my left, thunderclouds loom
I'm reminded of how far we've come
You taught me how to ride with no hands
If I could do what you could do
Make lightning strike in any room
We'd be dining out on more than Morley's

You
What would I do without you, my love?
You, my love

Nothing but good vibes
No more bloodshot eyes
Apply the root lock, suspend the breath
This is where I remember my dreams
Let's not waste our time
Let's move to Margate in our prime
And watch the Northern Lights glow
As we go slow

You
What would I do with out you, my love?
You, my love
