

Bruises

Kelela

No, oh, oh
No, oh, oh
Oh, step it in for me, baby
Just a little, baby
Oh, oh
Whoa, whoa, whoa

Push me when I'm down
I'm leaving but you hound me
Nothing more to say
You can find another way, yeah, yeah
No, I don't wanna do another round, ooh
You don't know but you're loud

Find another way
Find another way
Find another way
Find another way ('Nother way)

You wait for the encore
Wait till it breaks with the something to change
I can't relate, boy
But I changed my fate and my girl did the same
And we came to destroy
Your feelings are next but it's sad 'cause you're late
You're not gonna take more, ooh

Find another way (Another way)
Find another way (Another way, way)
Oh, step it up a little, baby
Oh, step it up a little for me, baby

A pause now you're thinking
That everything's fine but you know it's a lie
Apart but you're sinking
You're watching me work, you don't even try
You think you're escaping
Excuse, full of thing, but we all feel the same
You're mad but I'm saying

Find another way
Find another way
Find another way
