Ay yo while I dream about Fortune 500 man
Hundred grand bracelets
The diamonds in my ear only cost as much as a facelift
When the listeners picture this
They gon' say shit
Me and you fucking in the window of my spaceship
High like fuck
To all the bitches that I might fuck
Get to see they would only fuck my life up
The flyest couple killin' em suttle
Delivering our first born on a NASA space shuttle
Come on

Have you ever thought there might be something out there? Far out, way out
Would you think those movies are insinuating?
Look out, look out
Do you think you'd even know one if you saw one?
Watch out, watch out
If you think the government just don't do nothing
Watch out, watch out

The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for shrinks, just roll the rink
The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for a shrink

If you see what's coming our way then get ready Watch out, watch out
Ain't gonna be no one in bed to put your hands up
No doubt, look out
Better hide your babies and all of your family
Beware, look out
If you think the government just don't do nothing
Better watch out, watch out

The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for shrinks, just roll the rink
The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for a shrink

The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for shrinks, just roll the rink
The roller rink, the roller rink
Just skate away you don't need to think
No cars and minks, no Gucci links
No need for a shrink
