

Glow

Kelly Clarkson

You're the only one, only one I got my eyes on
And I don't need, I don't need but a second, then I'm gone
But when the snow starts falling
Christmas ain't far and I'm feeling
In my heart, in my bones, you're the secret I hold and you'll keep it
If you every need me, if you find yourself alone
Christmas is a season, lights like you glow all year long

Nothing has changed, I still wish you could be
Wrapped up in my arms, spending Christmas with me
When it gets cold is when I notice the most
With all the lights on the trees, even Christmas can't compete with your glow

Oh, reckless spending as I'm dreaming about how to get you alone
A little wine, slow dance, and making memories to mistletoe
Did you know that I thought about telling you a hundred times before?
And I'm standing in the hall 'cause I couldn't wait anymore
I could make you laugh, I would never let you down
My list in the past, Santa is indifferent now

Nothing has changed, I still wish you could be
Wrapped up in my arms, spending Christmas with me
When it gets cold is when I notice the most
With all the lights on the trees, even Christmas can't compete with your glow

(Glow, glow)
(Glow, glow)
Did you know, did you know Christmas can't compete with your
(Glow, glow)
Did you know, did you know, did you know, did you know
(Glow)
Did you know, did you know
Just so you know

Nothing has changed, I still wish you could be
Wrapped up in my arms, spending Christmas with me
When it gets cold is when I notice the most
With all the lights on the trees, even Christmas can't compete with your glow

It's a shame you can't see
Even Christmas can't compete with your glow
