

that's right

Kelly Clarkson

I ain't your little girl
You're confused and I've lost patience
Take your hurtful words
They won't stick and I won't chase them
I won't have your ghost
Runnin' all my revelations
My heart matters most
Keep the money, I'll take freedom

You and I (You and I)
Really means whatever you want (What you want)
Turns out I
Like to do things that you don't
That's right (That's right)
I like the ocean, that's right (That's right)
I sink my toes in, that's right (That's right)
The water's comin' tonight
I'll let you go with the tide

That's right, that's right

I ain't no damsel, boy
Me standin' here wasn't by mistake
Keep your tame white horse
Away from all my wild mustangs
I missed myself
It's been a while since I made time for me
Back on the shelf
But it's right where I wanna be

You and I (You and I)
Really means whatever you want (What you want)
Turns out I
Like to do things that you don't
That's right (That's right)
I like the ocean, that's right (That's right)
I sink my toes in, that's right (That's right)
The water's comin' tonight
I'll let you go with the tide

That's right, that's right

I was blue too long inside (Ooh)
Truth is that I'm tired of trying (Ooh)
Divin' straight into goodbye (Ooh)
Found myself in ocean eyes (That's right)

You and I (You and I)
Really means whatever you want (Oh, what you want)
Turns out I
Like to do things that you don't
That's right (That's right)
I like the ocean, that's right (That's right)
I sink my toes in that's right (That's right)
The water's comin' tonight
I'll let you go with the tide

That's right, that's right
Oh, ooh
That's right, that's right
