

Laser To The Heart

Kelsy Karter

Tellin' true lies, ridin' dark flames
I was givin' love a bad name
I told my heart to numb the nothing
Show I didn't feel you comin', ah

When your eyes met mine it felt just like

A laser to the heart
You cut straight through the dark
A wicked work of art
Go on and leave a scar
I know you wanna leave a mark
You're a vision in the night
Silver bullet through the sky
You burn me like a star
You're a laser to the heart

Hundred people here in this room
Why's it only feel like costume?
Once invisible but now it's physical, whoa
Can't go back now that I've found you, ah

When your eyes met mine it felt just like

A laser to the heart
You cut straight through the dark
A wicked work of art
Go on and leave a scar
I know you wanna leave a mark
You're a vision in the night
Silver bullet through the sky
You burn me like a star
You're a laser to the heart

Laser to the heart
You cut straight through the dark
A wicked work of art
Go on and leave a scar
You're a laser to the heart
You cut straight through the dark
A wicked work of art
Go on and leave a scar
I know you wanna leave a mark
You're a vision in the night
Silver bullet through the sky
You burn me like a star
You're a laser to the
Laser to the heart
