Pick a power  
And play that power perfect  
Put in work and then go get what you deserving  
Never said it would be pretty but it's worth it  
When you put the plan to hands you'll get it when you work  
Pick a power  
And play that power perfect  
Put in work and then go get what you deserving  
Never said it would be pretty but it's worth it

I was little  
Ma momma made a menace  
Scrappy nigga would send my haters to the dentist  
Went to church but wasn't 7th day Adventist  
More like 7th Ave bicycling flying past the tenants  
Burning rubber  
Hit willies in the middle  
Center divider drinking sprite and popping skittles  
As kid I used to tell my cousin whittles  
That one day I'd be the man the fam move out the griddle  
40 dollars  
In quarters out the bottle  
Filled the civic hit the ignition then hit the throttle  
Pullin' women that's spinning looking like models  
You the man you can spin that body like a bottle  
Pure persistence  
Ain't worried with distractions  
Ain't never scared to turn air into action  
You got the courage to make a life outta passion  
Issa million ways to get it make a choice and get it crackin'

Pick a power  
And play that power perfect  
Put in work and then go get what you deserving

Can I keep it real, speak my mind, when I buck you  
It's difficult to trust, when everybody wanna fuck you

Superstar, Star Power, bright lights above u  
I don't mean fame, no I'm talking bout the gift  
When you got that fire in your eyes they wanna hit  
Walking lick, looking lit, keep a stick, or be quick  
Make sure that your circle tight, so they can't ever box you in  
Could I ever settle?  
How could we ever settle?  
Niggas playing alchemist they making gold from metal  
Ello, ello, shawdy can you hear me?  
SOS I'm in distress if shawdy is not near me  
Shawdy being synonym for anything that cures  
We all got our vices everybody got their drugs  
Promise me you will not be distracted by the above  
Go follow your heart, then you are bound for taking off
