

Close To Your Heart

Kenan Doğulu

I'll be your angel now
I'll be your slave baby
I'll keep the bad days away
Just like my own baby
Like a newborn baby
Give you the rest of my days

Let me in, let me in, let the music begin
Let me in, let me in, I'm out the rain
Let me in, let me in

Seems you missed me right from the start
Never wrote my name into your heart
Seems you missed me right from the start
Never kept my name close to your heart

Seems you missed me right from the start
Never wrote my name into your heart
Seems you missed me right from the start
Never kept my name close to your heart

I'll be your angel now
I'll be your slave baby
I'll keep the bad days away
Just like my own baby
Like a newborn baby
Give you the rest of my days

Let me in, let me in, let the music begin
Let me in, let me in, I'm out the rain
Let me in, let me in

Seems you missed me right from the start
Never wrote my name into your heart
Seems you missed me right from the start
Never kept my name close to your heart

Seems you missed me right from the start
Never wrote my name into your heart
Seems you missed me right from the start
Never kept my name close to your heart

Stop resisting, take a new measure
Passion is a rare and long-last treasure
Driven men insane for generations
Spilling much blood all across the nations
It'll make you cry, make you learn to fly
Close your sleep at night and drain you dry
Let's just do the thing we're certain of
Come on let's work in the service of love
Come on let's work in the service of love
Come on let's work in the service of love
Come on let's work in the service of love
Come on let's work in the service of love
Come on let's work in the service of love
Come on let's work in the service of love
