

Where Do We Take It (From Here)

Kenny G

I am the victim of the morning task
And I want to welcome to the human mind
I push the button with the slightest touch
Curing things would be the marching bound

Where do we take it from here? (from here?)
How will we make it from here?

Fire in the distance to my only heart
With better medicine and get real fun
Better miracles with telephone, I let no mind of woman be a phone

Where do we take it from here? (from here?)
How will we make it from here?

(Whoop!) Whoa, back to back!

Left! Ugh! Right! Ugh! Yeah!

I am a prisoner with a modern age, I'm just a puppy trapped in
a cage
Incense and vanity, I need more air
It's just too common, so I've had to burn

Where do we take it from here? (from here?)
How will we make it from here? Bum bum bum bum
Where do we take it from here? (from here?)
How will we make it from here?

(Whoop!)

Where do we take it from here? (from here?)
How will we make it from here?

Ow, back to back!

Where do we take it from here? (from here?)
How will we make it from here?
Where do we take it from here? (from here?)
How will we make it from here?
Where do we take it from here? (from here?)
How will we make it from here?
Where do (where do) we take it (we take it) from here? (from here?)
