

# Baby You're the One

Kenny Lattimore

Baby you're the one, you the only one  
So know that I'll do anything just to keep you close  
That's how it's gotta be, just so I can breathe  
Say you'll be with me  
Share my world and be my girl

Thirty seconds ago we just got finished talkin on the phone  
And even though we talked for hours, why am I feeling all alone  
?  
Could it be that I just never got enough of hearing your tone,  
your sexy tone  
Cause if being here without you girl is right,  
I guess I'm gonna be wrong  
Cause you're the only one

Baby you're the one, you the only one  
So know that I'll do anything just to keep you close  
That's how it's gotta be, just so I can breathe  
Say you'll be with me  
Share my world and be my girl

My girl, see what it all comes down to  
Is you're definitely where I need to be  
And where I'm gonna be  
Four hundred acres and a horse, picture it a mansion on the beach  
Spending time with you, that's all I wanna do  
The situations clear, I gotta have you near

Baby you're the one, you the only one  
So know that I'll do anything just to keep you close  
That's how it's gotta be, just so I can breathe  
Say you'll be with me  
Share my world and be my girl

I want to share special times with you here  
Never let you go no, keep you in my arms and hold you close  
Real close I want to spend every minute with you  
Never let you go keep you in my arms and hold you close  
Real close, you're the only one

Baby you're the one, you the only one  
So know that I'll do anything just to keep you close  
That's how it's gotta be, just so I can breathe  
Say you'll be with me  
Share my world and be my girl
