

# That Silent Night

Kenny Rogers

Snow came down that silent night  
It was quite a sight to see  
There were whispers and bells and angel wings  
And you were holding me

And the snow came down that silent night  
Still there in my memory  
With the crackle of the fire and the echos of the choir  
And you were holding me

And the world spins around, and the seasons they change  
Letting go, moving on, nothing stays the same  
Winter turns to Spring, Summer turns to Fall  
Our shadows on the wall, I still can see  
I was holding you, and you were holding me

The back roads they turn into highways  
And most days I still hear your song  
Almost makes it worth leaving when I hear you singing  
Oh lord wont you sing me back home?

And the world spins round, and the seasons they change  
Letting go moving on, nothing stays the same  
Winter turns to Spring, Summer turns to Fall  
Our shadows on the wall, I still can see  
I was holding you, and you were holding me

Winter turns to Spring, Summer turns to Fall  
Wont be long at all, what a joy it will be  
On that silent night when I'm holding you, and you are holding  
me  
Mmm-hmm
