

# When We Made Love

Kenny Rogers

We were all we ever wanted  
Before there was a single brick in this wall  
That keeps the distance here between us  
We built ourselves a life and we forgot  
We already had it all.

When we made love, we made love  
Baby, we had something  
That nothing else could touch  
When we made love.

Through the lonely that divides us  
I can feel you're reaching from the other side  
Let's tear down this wall and start all over  
And we'll get back to the simple life.

When we made love, ...

Just pass the doubts beyond the hurt  
We're not too far from where we were.

When we made love, ...
