

Meteor (Edit)

Kenya Grace

One day left on Earth

You were in my dream
And you told me that a meteor was heading straight for me
You said I've got a week to make sure I know who to see

If we had one day left on Earth
Would you call me? Would you call me?
And in our last few moments left
Would you want me? Would you want me?
If we had one day left on Earth (One day left on Earth)
Bet you'd call me, would you call me?
And in our last few moments left
Would you want me? Would you want me?

Would you want me?
Would you want me?
Would you want me?
Would you want me?
Would you want me?

You were talkin' in your sleep
You told me how this life was gettin' hard for us to keep
You said we had a week
But you see there is no guarantee
Fire in the sky
And right before you die
You'll wish I had more time by your side

If we had one day left on Earth
Would you call me? Would you call me?
And in our last few moments left
Would you want me? Would you want me?
If we had one day left on Earth (One day left on Earth)
Bet you'd call me, would you call me?
And in our last few moments left
Would you want me? Would you want me?

Would you want me?
Would you want me?
Would you want me?
Would you want me?

In the end (In the end), if love's a battle
I won't be scared if you're here with me
Here with me
In the end, if love's a battle (In the end, if love)
I won't be scared if you're here with me
One day left on Earth
One day left on Earth

If we had one day left on Earth
Would you call me? Would you call me?
And in our last few moments left
Would you want me? Would you want me?
If we had one day left on Earth
Bet you'd call me, would you call me? (One day left on Earth)

And in our last few moments left
Would you want me? Would you want me?

Would you want me?
One day left on Earth
Would you want me?
One day left on Earth
Ooh
