

Mimicry

Kerli

I breathe to see your face
Cut to the bone
Always frozen and blue
Just to see you
I followed all your signs
Pressed through the snow
I was battered and bruised
Just to see you

I followed footsteps going nowhere
Until I realized you don't care
Hiding in plain sight
Messing with my mind
Looking on as I bled there
Fucking predator, how do you dare
To play death

Mimicry
Shifting with the light
Changing by the night
You're a glorious spy
I'll never find you
Creature of disguise
You just take a life
And play death

Mimicry
Shifting with the light
Changing by the night
You're a glorious spy
I'll never find you
Creature of disguise
You just take a life
And play death

My lips turned artic white
Kiss in the cold
I was gasping for warmth
Just to see you
I swear my body fights
Just as you taught
And I left my own worth
Just to see you

I followed footsteps going nowhere
Until I realized you don't care
Hiding in plain sight
Messing with my mind
Looking on as I bled there
Fucking predator, how do you dare
To play death

Mimicry
Shifting with the light
Changing by the night
You're a glorious spy
I'll never find you

Creature of disguise
You just take a life
And play death

Mimicry
Shifting with the light
Changing by the night
You're a glorious spy
I'll never find you
Creature of disguise
You just take a life
And play death
