

Been Some Time

Kerser

Take me to paradise
Better be on [?]
What a way to have a life
Would've made a sacrifice
Now I'm sitting in first class
Looking at the world fast
Man, I got my chains on
Man, I'm high and I still got my shades on
Now my plane just landed
In a state for a show I ain't planned yet
But they told me it's sold out
And it go with the album rollout
Nothing new man, born for the music
Don't know why I'm getting torn when I do it
'Cause I'm set and my catalogue a jackpot
Any style man, I haven't got a lack of
And I speed right by you
Shine so bright that my watch might blind you
She 5'2" but a 10, what a nice view
Look in my eye, she can tell that I'm high too
Still loving the game bro
Gotta love hate playing with the fame though
Let the hike control where my brain go
I don't know what it was but I take those
Then I hit new heights right, I don't look in hindsight
I live in the moment, the momentum has the moment frozen
I see it all from a birds eye view
Girls around AUS want to curse like you
I'mma just ride, I'm the smoothest right
I took a break to see if I could do this twice

It's really been some time, you really watched me grow
You helped me hit the top, now will you watch me go
It kinda hits I know, with every spit or flow
And every gig slash show, this is my gift let's go

It's really been some time, you really watched me grow
You helped me hit the top, now will you watch me go
It kinda hits I know, with every spit or flow
And every gig slash show, this is my gift let's go

It's really, nothing but big hits
Who else shows packed with the bitches
That's a Kerser difference
Oh, you heard the sickest?
My life I could dream but, gotta train my mind just to keep up
Getting stuck in a smoke cloud, woke up getting sucks on a boat now
Must've I got switched up, sick cunt I'm just filled with big bucks
Sipping cups like I'm dehydrated, drunk cunt look at me I made it
Now I'm hitting the bright lights, [?] I treat it like a fright night
Yeah we can drop off, push music in the shit like a hotshot
I'ma float where the vibe go, you fuck up the vibe like 5-0
Can't beat around the bush, I'm like hydro
Watch the sun come up, wishing I go
Still up and being wasted, fuck Triple J
Still fuck what they say, they probably pump this today
Like nothing has changed, but the company is slayed

'Cause I fucked them again like uh
Let me drop my hits, spit hot shit then we drop my lips
You see cunts spit, but not like this
Yeah you had a run, you ain't hot like this
I'ma claim my spot, find the sun when the reign won't stop
And the pain won't drop, but we marching on
I got the flame but I find it hard to pass it on

It's really been some time, you really watched me grow
You helped me hit the top, now will you watch me go
It kinda hits I know, with every spit or flow
And every gig slash show, this is my gift let's go

It's really been some time, you really watched me grow
