

High Demand

Kerser

Trip
Kerser
They sayin' I'm high demand
And they sayin' like I don't know already
I'm like I know

I told my girl, "kick back and chill"
She said "you told me at the start, I can't believe it's real"
For real
This kind of life was hard to reach
It's tricky making sure you're setting up
While leaving marks on beeps
Appreciation doubles up
Every time I drop - I double up, I double-doubles
But it's all about the drive, most be running out of [?] though
It ain't your dream if you wake up just let it go
Now I'm driving down the coastline
Looking at the glowing sky
'Bout to make a toast high
This shit ain't what it seems
You only picture what I mean
I only listen if it's me, shit
Why take advice if you never pay the price
And you never saved a life
How you have a say in mine? You wouldn't
You couldn't man, I'm blazing buds
Don't question if I'm taking drugs
You question if I take enough
I made you love me

We don't need a plan
If I'm involved, that's high demand
They can't do it like we can
I hope you understand

We don't need a plan
If I'm involved, that's high demand
They can't do it like we can
I hope you understand

I told myself, "kick back and chill"
Labels fighting over deals
Which is funny when you think of it
They never had a shit to give
But suddenly I'm Mr. King
I love it, yeah she love it too
The city lights, all the beaches
I told her, "pick the view"
Hacking up a fat bud
While smoking, getting back rubs
Pills all up in my system while I'm listening to track one
I feel it in the air tonight
Number one again, I'm not surprised
If I'm swerving, then I'm lit up
She roll me up, while I'm listening to "Winner"
Shit just ain't the same, 'til you witness my display
I'm claiming victory today, I've reached my mission to be great

Let me slowly drift off
I'm in the zone, I'm the one who made this shit hot

We don't need a plan
If I'm involved, that's high demand
They can't do it like we can
I hope you understand

We don't need a plan
If I'm involved, that's high demand
They can't do it like we can
I hope you understand
