

# Off My Head

Kerser

I make it fresh, anything you see me rockin', lad  
I'm not in pain but I have to thank the Oxy tabs  
So don't ask when it's nine at night and I'm high as kites  
And you're like, "Why's your eyes.." stop  
We ain't runnin' with that bullshit  
I'm lightin' blunts that are same size as a pool stick  
Got a freak bitch here, she likes to touch her toes  
Type of bitch to hit your bladder with her fuckin' nose  
I remember when I got my first paycheck  
I was like, "Shit mad, I can pay debt"  
Then you see the boy fly, first they hate that  
They compare me to the rest, they like, "You great, lad"  
I go hard, I'm a weapon from the southwest  
Put the city on my back  
C-Town rep, before it was cool  
We used to score before school  
And try to light this shit up behind the portables, too

I will always be off my head  
That is even what my doctor said  
I will always be on my meds  
That is even what my doctor said

I will always be off my head  
That is even what my doctor said  
I will always be on my meds  
That is even what my doctor said

Drip swag, wet sauce on your bitch's puss  
I ain't wanna puff the shit if it isn't kush  
My life crazy, I probably shoulda writ a book  
Fuck your favourite singer, then I make her sing the hook  
I been to space from the drugs like a couple times  
Every year a new pay, I like to double mine  
I'm my troubled mind, still makin' magic hits  
I keep it old-school, still rockin' baggy shit  
Fashion icon, I double any brand's profit  
I am Kers, so they tryna get their hands on it  
I swear to God people see me as a dollar sign  
Half the reason why these lads got their collar rised  
Shiftin' Aus rap culture with my two hands  
They gonna look back in a few years like it's true man  
No one done it like the Kers, I think you know that  
Every day I could post a classic throwback

I will always be off my head  
That is even what my doctor said  
I will always be on my meds  
That is even what my doctor said

I will always be off my head  
That is even what my doctor said  
I will always be on my meds  
That is even what my doctor said

I'm off my head, I'm off my head (what?)...
